Cut your mountaineering teeth on the course that teaches big mountain skills in the home of big mountains—the Himalaya. Developed and led by our experienced IFMGA Mountain Guides, our Himalayan Climbing Course provides you with both a solid foundation in high altitude mountaineering and your first 6,000m summit!

Learn high-altitude mountaineering skills from experienced Himalayan mountain guides and how to look after yourself properly in this stunning, yet high consequence environment. Our Himalayan Climbing Course will help you on the pathway to becoming a mountaineer by introducing skills then immediately putting them into practice on climbs of increasing difficulty and elevation.

At the completion of the skills development phase, the course culminates in an ascent of Lobuche East at 6,119m/20,075ft high. In addition to the actual climbing skills and mountain movement you will develop your self-awareness and you can utilise the learning to springboard your high-altitude climbing career on an uphill trajectory!

COURSE OBJECTIVE

Our objective is to pass on the skills, which have made us successful in our own climbing careers. The most important attributes being:

- Current techniques for high-altitude mountaineering
- A climbing standard appropriate to the objective
- Attuned mountain awareness
- Sound judgement of your own abilities
- Solid planning and preparation skills
- The basis of good decision making

SKILLS COVERED

We endeavour to cover the following skills during the course, however, factors such as weather and climbing conditions may dictate that some skills are not covered in full:

▲ Learn high-altitude mountaineering rope skills. Photo: Karyn Douglas

- Fundamental snow and ice craft skills
- Rope skills applicable to high-altitude alpine climbing
- Glacier travel and self rescue skills
- Weather analysis
- High-altitude medicine
- Route finding and navigation
- Snow and expedition camping skills

At the end of the course, participants should have the skills and confidence to travel in glaciated terrain. You will have the technical ability and know-how to attempt major mountains by their easier routes, such as the trekking peaks in the Himalaya. The program will also set you up with sufficient prowess to be guided on some technically difficult ascents and expeditions.

CLASS SIZE

For the Himalayan Climbing Course, we will take a minimum of 5 people and maximum of 12 people, hence spaces are limited.

HOW THE COURSE OPERATES

The course initiates in the city of Kathmandu, where we spend valuable time preparing for the course, covering introductory topics and checking equipment. We then fly into Lukla airport, gateway to the Khumbu Himal and home to many of the Sherpa team who will be assisting on the course.

The following days are spent gradually making our way through the mountains to higher altitude. We intersperse trekking with lectures and training sessions on a variety of topics. The pace is dictated by proper acclimatisation, allowing our bodies time to adjust to each increase in altitude.

On what would be a typical expedition 'rest day' we busy ourselves by training. Experiential learning is a major factor in learning how to be a competent mountaineer. The emphasis of the course is on safe application of skill development. Initially, you will develop and reinforce your skills in a contained environment before moving on to more challenging terrain as the course progresses and eventually culminating with an ascent of Lobuche East.

You will visit the Khumbu Climbing Centre, where Climbing Sherpa hone their technical skills and visit the Himalayan Rescue Association in the high alpine village of Pheriche. At the Cho La you'll delve into snow and ice techniques including glacier travel and crevasse rescue.

Eventually we move to Lobuche East Base Camp and prepare for our ascent. The teaching continues throughout, and at High Camp you're introduced to high-altitude alpine camping skills before the climb.

High-altitude mountaineering can involve long days with early starts in order to gain a summit and descend before nightfall. There are times when the weather may be rough, you may feel pushed to your limit and as you gain altitude there can be periods of discomfort.

From time to time factors such as team health or adverse weather may impact on the planned program. Flexibility is key to any high-altitude adventure and whatever happens, your guides will use their considerable experience to ensure you get the best from the course that can be offered.

You should take the opportunity to develop additional skills before the course commences. Rope skills can be learned through local alpine clubs and indoor rock climbing centres. Any previous rock or alpine climbing experience will allow you to gain even more from the course.

LOBUCHE EAST ASCENT

The Lobuche East ascent offers course participants an opportunity to put into practice those skills they have learnt and developed over the course on a genuine 6,000m/19,685ft Himalayan peak.

To ascend Lobuche East, we climb steep pathways on the rocky flanks of the lower mountain to High Camp where we spend two nights on our way to the summit.

High Camp is dramatic, with exceptional views towards Cholatse, Taweche and Ama Dablam, especially at

sunset when the peaks turn pink as the sun sets into Tibet. We climb to the far eastern summit on the summit ridge, a subsidiary of the high peak.

An early alpine start sees the group climbing rocky trails, with short steeper sections—some of these have a fixed rope that we clip onto to protect ourselves. During the pre-monsoon season the route from High Camp is often covered in snow. The climbing later involves snow and ice where the use of crampons and fixed ropes are necessary. From the summit the group rappels back down the steeper section and returns to Base Camp.

PREREQUISITE EXPERIENCE

Participants must have good fitness, balance and coordination. Previous snowcraft or rock climbing is not necessary, as these skills will be taught in the instruction part of the trip.

ISLAND PEAK ADD ON

THE ADVANTAGES OF CLIMBING WITH ADVENTURE CONSULTANTS

Adventure Consultants is renowned for the quality of its service and strategy applied to high altitude expedition climbing and instruction courses. Our reputation is attributed to meticulous planning and experienced logistics coordination. We have a philosophy of investing in every trip to offer our climbers the best possible chance of success.

Our courses have been designed by Guy Cotter who has been climbing for over 35 years. Additional to his extensive record in New Zealand, his career has includes over 40 high altitude expeditions and polar journeys, including several ascents of Mount Everest and other 8,000m peaks.

As an IFMGA guide since 1991, Guy Cotter recognises the need for people to learn about 'climbing', and not just being taught the technical skills in isolation. This is not an easy task and cannot be achieved without experienced and highly skilled guides with good instructional skills. The guides and Sherpa staff at Adventure Consultants are recognised as amongst the best in the industry with the ability to help you get the most from your time with us.

The main points of difference on an Adventure Consultants Course are:

- More time to gain experience while practicing skills
- Highly experienced expedition guides and Sherpa instructing
- Gain valuable experience at altitude while learning essential expedition skills

VISAS

Members will be required to obtain an entry visa into Nepal at the beginning of the expedition and this is easily procured at Kathmandu Airport on arrival. The trekking and climbing permits are a separate matter dealt with by the expedition agent.

FOOD

Food will be of the highest standard possible, given the remoteness of the situation. Please inform us if you have any special dietary requirements. We will dine at lodges in the Khumbu Valley, and at our Cho La Camp and Lobuche East Base Camp we will be catered for by our expedition cook and support crew. Our camp equipment and ample nutritious meals are always the envy of other groups along the way! We do recommend that you bring some of your personal favourite snacks like muesli bars, chocolate and/or candy to supplement the snacks that we provide.

EQUIPMENT LIST

Course members will be sent a list detailing all necessary clothing and equipment to be individually provided.

MEDICAL EXAMINATION

Course members will be provided with pre-trip medical advice and a medical questionnaire and will be asked to visit their family physician to receive a full medical examination. This information will be sighted only by the Course Leader and our medical adviser and treated with full confidentiality.

DOCUMENTATION & PHOTOGRAPHS

Course members will need to provide a digital passport photograph for various climbing and trekking permits and a copy of their passport biodata page.
